Descrizione

Applicable to various brands of walking tractors and power mowers, the leveling blade is adjustable from 0° to 30 ° with self-leveling joint. On request: swivel wheels with adjustable height, ballast.

Uses: as **snow blade**, for **leveling the ground and inert material** such as sand and gravels etc.

The use of the leveling blade mounted on operating machines with tracks, increases the thrust power and the adherence to the ground avoiding slippage that would occur with the wheels.
